

# Summer Fun

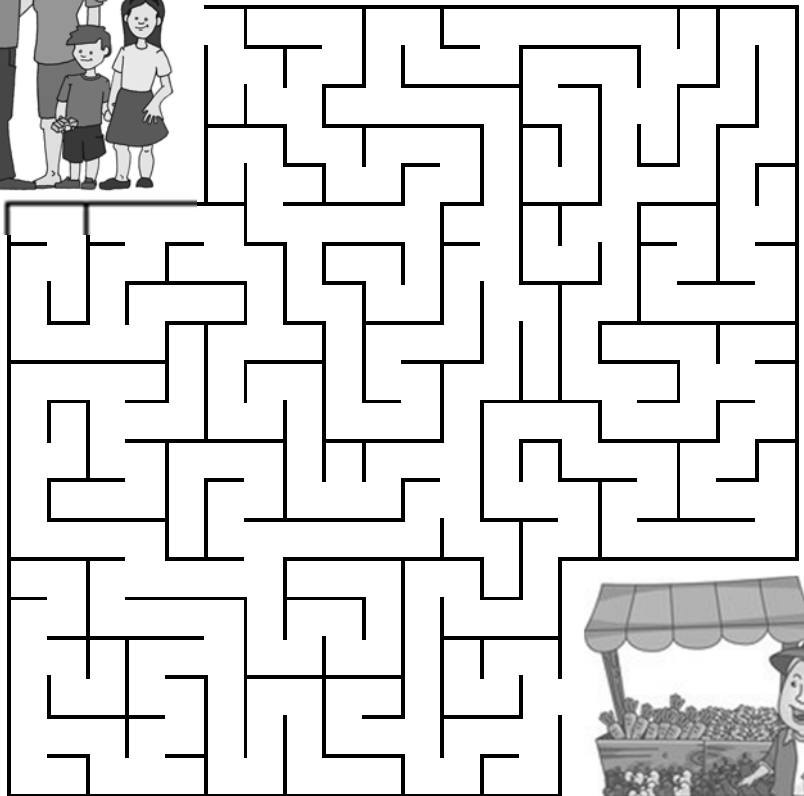

Many families like to grow vegetable gardens in the summer. Popular garden vegetables include tomatoes, cucumbers, zucchini, squash and cucumbers. Gardeners begin by planting either seedlings or seeds.

Design and decorate your own seed packet in the rectangle to the left. Include the plant's name as well as an illustration.

Summer is a great time to visit a local Farmers Market to find a wide variety of fresh produce.

Complete the maze to help the family get to the market.

For more resources to connect children to agriculture, visit Agriculture in the Classroom online at [AgInTheClass.org](http://AgInTheClass.org).
